Introduction 9

Chapter 1: History, Benefits, and Tenets of Agile Project Management 18

History of Agile 20

Advantages of Agile Project Management 23

Better Quality 24

Better Customer Satisfaction 25

Better Transparency 26

Better Control 27

Better Predictability 28

Better Risk Management 30

Better ROI 31

Better Metrics 31

Better Collaboration 32

Better Work-Life Balance 33

The Main Principles of Agile Project Management 35

The Agile Manifesto 36

The 12 Agile Principles 37

Chapter 2: Understand the Principles of Agile Project Management 40

Customer Satisfaction 41

Making and Managing Changes 44
Continuous Customer Input 47
Daily Meetings 49
Sustainable Development 51
Continuous Improvement 53
Simplicity as a Vital Element 55
Self-Organizing Team 56
Inspect and Adapt 58
Chapter 3: Implementing Agile: How to Apply the APM Method Effectively 60
Define Your Vision 63
Life Cycle Selection 66
The Predictive Life Cycle 67
The Iterative Life Cycle 68
The Incremental Life Cycle 69
The Adaptive Life Cycle 70
Creating an Agile Environment 71
Setting the Example 72
Being a Leader 73
Adopting Critical Thinking 74
Stimulating Collaboration 74
Plan "Just Enough" 75
Encouraging Face-to-Face Conversations 75
Creating the Physical Agile Environment 76
Delivery in an Agile Environment 77
Organizational Consideration for Project Agility 78
Call to Action 80

Chapter 4: Tools and Methodologies for Quality Control in APM *83*

Clarizen **83**

Trello **84**

GitScrum **85**

Jira **85**

Taiga **86**

Nostromo **86**

Hansoft **87**

Blossom **88**

Ravetree **88**

Chapter 5: Managing Risk in Agile Project Management **90**

Classify **92**

The Descriptive Method 93

The PESTLE Method 94

Quantify **95**

Plan **98**

Act **100**

Repeat **101**

Chapter 6: Scaling Agile Projects *103*

The Scaling Challenge **105**

Scaling at Team Level 107

Scaling at Project Level 108

Scaling at Company Level 109

Agile Scaling Models **111**

SAFe (Scaled Agile Framework) 112

DaD (Disciplined Agile Delivery) 112

LeSS (Large Scale Scrum) 113
Nexus 114
LeadingAgile 115
The Scrum of Scrums 115
Building Agile Teams 116
Be Patient 117
Adapt to Change 118
Be Results-Driven 119
Don't Miss the Bigger Picture 120
Be Transparent 121
Ask for Feedback 121
Give Feedback on a Regular Basis 122
Show Trust — Always 123
Have Clearly Defined Roles 123
Encourage Team Members to Help Each Other 124
Make Your Office a Comfortable Place 125
Maintain the Stability of the Team 126
Listen 127
Believe 127
Scaling Up: Agile Practices 129
Start with the MVP — The Minimum Viable Product 130
Use One Product Backlog 131
Make Sure Everyone Understands the Process 132
Emphasis on Collaboration 133
Trainings, Courses, and Certifications 133
Improve Your Development Infrastructure 134

Stick to Smaller Teams 135
Coordinate the Production Time with the Iteration Length 135
Make Sure Someone Is the Product Owner 136
Synchronize the Iterations Across Teams 137
Use the Right Tools 137
Face to Face Meetings and Team Buildings 138
Scaling Out: Disturbed Projects 139
Conclusion 146
