What's New in the 2008 Edition of This Book?	ix
List of Figures	xix
List of Tables	xxi
Chapter 1	
Background and General Information (ASME B31.3, Foreword, Introduction and Chapter I)	1
1.1 History of ASME B31.3	1
1.2 Scope of ASME B31.3	2
1.3 What is Piping?	3
1.4 Intent	4
1.5 Responsibilities	5
1.5.1 Owner	5
1.5.2 Designer	6
1.5.3 Manufacturer, Fabricator, and Erector	6
1.5.4 Owner's Inspector	6
1.6 How is ASME B31.3 Developed and Maintained?	6
1.7 Code Editions, Errata and Code Cases	8
1.8 How Do I Get Answers to Questions About the Code?	8
1.9 How Can I Change the Code?	9
Chapter 2	
Organization of ASME B31.3	11
2.1 Fluid Services	11
2.2 Code Organization	12
2.3 Listed Components	13
2.4 Listed Materials	13
2.5 Safeguarding	13
Chapter 3	
Design Conditions and Criteria (ASME B31.3, Chapter II, Parts 1 and 6)	17
3.1 Design Conditions	17
3.1.1 Design Pressure	17
3.1.2 Design Temperature	17
Insert 3.1 Calculation of Wall Temperature for Refractory-Lined Pipe	18
3.1.3 Design Minimum Temperature	20
3.2 Allowable Stress	20

3.3	Quality Factors	21
3.4	Weld Joint Strength Reduction Factors	23
	Insert 3.2 Background on Weld Joint Strength Reduction Factors	26
3.5	Allowances for Pressure and Temperature Variations	28
3.6	Overpressure Protection	29
 Chapter 4		
	Pressure Design (ASME B31.3, Chapter II, Part 2)	31
4.1	Methods for Internal Pressure Design	31
4.2	Pressure Design of Straight Pipe for Internal Pressure	32
	Insert 4.1 Sample Wall Thickness Calculation	36
	Insert 4.2 Basic Stress Calculations for Cylinders Under Pressure	36
4.3	Pressure Design of Straight Pipe Under External Pressure	38
4.4	Pressure Design of Welded Branch Connections	41
4.5	Pressure Design of Extruded Outlet Header	44
4.6	Additional Considerations for Branch Connections Under External Pressure	44
4.7	Branch Connections That are Presumed to be Acceptable	44
4.8	Pressure Design of Bends and Elbows	45
4.9	Pressure Design of Miter Bends	47
4.10	Pressure Design of Closures	48
4.11	Pressure Design of Flanges	49
4.12	Pressure Design of Blind Flanges	49
4.13	Pressure Design of Blanks	49
4.14	Pressure Design of Reducers	50
4.15	Pressure Design of Unlisted Components	50
 Chapter 5		
	Limitations on Components and Joints (ASME B31.3, Chapter II, Parts 3 and 4)	53
5.1	Overview	53
5.2	Valves	53
5.3	Flanges	54
5.4	Fittings, Bends, Miters, and Branch Connections	55
5.5	Bolting	56
5.6	Welded Joints	57
5.7	Flanged Joints	57
5.8	Threaded Joints	58
5.9	Tubing Joints	58
5.10	Miscellaneous Joints	59
 Chapter 6		
	Design for Sustained and Occasional Loads (ASME B31.3, Chapter II, Part 1)	61
6.1	Primary Longitudinal Stress	61
6.2	Sustained Longitudinal Stress	61
	Insert 6.1 Span Limits for Elevated Temperature Piping	62
6.3	Limits of Calculated Stresses Due to Occasional Loads	66
 Chapter 7		
	Design Criteria for Thermal Stress (ASME B31.3, Chapter II, Part 1)	69
7.1	Allowable Stress for Thermal Expansion	69
	Insert 7.1 What About Vibration?	75
7.2	How to Combine Different Displacement Cycle Conditions	76

Chapter 8

Flexibility Analysis (ASME B31.3, Chapter II, Part 5)	77
8.1 Flexibility Analysis	77
8.2 When is Formal Flexibility Analysis Required?	78
8.3 When is Computer Stress Analysis Typically Used?	79
8.4 Stress Intensification Factors	80
8.5 Flexibility Analysis Equations	83
8.6 Cold Spring	84
Insert 8.1 How to Increase Piping Flexibility	84
8.7 Elastic Follow-up/Strain Concentration	85
8.8 Effect of Elastic Modulus Variations Due to Temperature	88
8.9 Alternative Rules for Flexibility Analysis	88

Chapter 9

Supports (ASME B31.3, Chapter II, Part 5)	91
9.1 Overview of Supports	91
9.2 Materials and Allowable Stress	91
9.3 Design of Supports	92
Insert 9.1 Spring Design	93
Insert 9.2 Stress Classification	95
9.4 Fabrication of Supports	100

Chapter 10

Load Limits for Attached Equipment	101
10.1 Overview of Equipment Load Limits	101
10.2 Pressure Vessels	101
10.3 Other Equipment Load Limits	102
10.4 Means of Reducing Loads on Equipment	102

Chapter 11

Requirements for Materials (ASME B31.3, Chapter III)	103
11.1 Overview of Material Requirements	103
11.2 Qualification of Unlisted Materials	104
11.3 Use of Materials Above the Highest Temperature for Which Allowable Stresses Are Provided	104
11.4 Low-Temperature Service	105
11.5 When is Impact Testing Required?	105
11.6 Impact Test Requirements	110
11.7 Fluid Service Limitations	111
11.8 How to Use the Allowable Stress Tables in Appendix A of the Code	111

Chapter 12

Fabrication, Assembly, and Erection (ASME B31.3, Chapter V)	117
12.1 Overview of Chapter V of ASME B31.3	117
12.2 General Welding Requirements	117
Insert 12.1 Arc Welding Processes	118
12.3 Welding Procedure Specification	122
12.4 Welding Procedure Qualification Record	123
12.5 Welder Performance Qualification	123
12.6 Preheating	124
12.7 Heat Treatment	124

12.8	Governing Thickness for Heat Treatment	128
12.9	Pipe Bends	129
12.10	Brazing and Soldering	130
	Insert 12.2 Brazing	130
12.11	Bolted Joints	130
12.12	Welded Joint Details	131
12.13	Miscellaneous Assembly Requirements	133
Chapter 13		
	Examination (ASME B31.3, Chapter VI)	135
13.1	Overview of Examination Requirements	135
13.2	Progressive Examination	136
13.3	Types of Examination	137
13.4	Required Examination	138
13.5	Acceptance Criteria	138
13.6	Examination of Nonmetallics	140
Chapter 14		
	Pressure Testing (ASME B31.3, Chapter VI)	141
14.1	Overview of Pressure Test Requirements	141
14.2	Hydrostatic Test	142
14.3	Pneumatic Test	143
14.4	Hydropneumatic Test	143
14.5	Alternative Leak Test	143
14.6	Sensitive Leak Test	143
14.7	Jacketed and Vacuum Piping	144
14.8	Initial Service Leak Test	144
14.9	Closure Welds	144
14.10	Requirements for Nonmetallic Piping	145
Chapter 15		
	Nonmetallic Piping (ASME B31.3, Chapter VII)	147
15.1	Organization	147
15.2	Design Conditions	147
15.3	Allowable Stress	147
15.4	Pressure Design	148
15.5	Limitations on Components and Joints	149
15.6	Flexibility and Support	149
15.7	Materials	150
15.8	Bonding of Plastics	151
	Insert 15.1 Bonding Processes	152
15.9	Other Fabrication, Assembly, and Erection Requirements	158
15.10	Examination and Testing	158
Chapter 16		
	Category M Piping (ASME B31.3, Chapter VIII)	159
16.1	When to Use the Rules for Category M Fluid Service	159
16.2	Organization of Chapter VIII of ASME B31.3	160
16.3	Overview of Metallic Rules	160
16.4	Overview of Nonmetallic Rules	161
16.5	General Comments	161

Chapter 17

High-Pressure Piping (ASME B31.3, Chapter IX) 163

17.1 Scope of Chapter IX of ASME B31.3 163

17.2 Organization of Chapter IX of ASME B31.3 163

17.3 Pressure Design of High-Pressure Piping 164

17.4 External Pressure 166

17.5 Design for Sustained and Occasional Loads 166

17.6 Design for Thermal Expansion and Fatigue 166

17.7 Materials 167

17.8 Fabrication 168

17.9 Examination 168

17.10 Testing 169

17.11 Records 169

Chapter 18

Bellows Expansion Joints (ASME B31.3, Appendix X) 171

18.1 Overview of Bellows Requirements 171

18.2 Rules for Pressure Design 171

18.3 Fatigue Design 173

18.4 Unreinforced-Bellows Fatigue Curve Development 173

18.5 Reinforced-Bellows Fatigue Curve Development 175

18.6 Fatigue Design for Other Alloys 175

18.7 Correlation Testing 176

18.8 Elevated-Temperature Design 178

18.9 Shop Test of Expansion Joints 178

18.10 Field Test of Piping Systems with Expansion Joints 179

18.11 Future Developments 180

 Insert 18.1 Pressure Thrust Considerations 180

Appendix I

Useful Information for Pressure Design 181

Appendix II

Guidelines for Computer Flexibility Analysis 199

Appendix III

Useful Information for Flexibility Analysis 203

Appendix IV

Expansion Joint Guide 238

Appendix V

Conversion Factors 264
